DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group I:

Species A: covering comprises body helically wound about core.

Species B: covering comprises plurality of adjacent rings inserted on core.

Group II:

Species AA: the covering before pressing has a substantially elliptical cross section.

Species BB: the covering before pressing has a substantially rectangularshaped cross section.

Group III:

Species AAA: first soluble portion of core comprises of brass, copper or tombac alloy and solvent is nitric acid.

Species BBB: first soluble portion of core comprises aluminum and solvent is caustic soda, claim 69.

Species CCC: first soluble portion of core comprises mild steel and solvent is chloridric acid.

Species DDD: first soluble portion of core comprises a polymeric material and solvent is a solution liquid.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claim 44, Species A.

Claims 45-48, Species B.

Claim 49, Species AA.

Claim 50, Species BB.

Claim 68, Species AAA.

Claim 69, Species BBB.

Claim 70, Species CCC.

Claim 71, Species DDD.

The following claim(s) are generic: 1.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Group I:

Application/Control Number: 10/533,662

Art Unit: 3726

Species A has the special technical feature of a helically wound elongated covering.

Species B has the special technical feature of a covering comprising a plurality of adjacent rings.

Species AA has the special technical feature of a covering of elliptical cross section.

Species BB has the special technical feature of a covering of a rectangularshaped cross section.

Species AAA has the special technical feature of a brass, copper or tombac alloy core and a nitric acid solvent.

Species BBB has the special technical feature of an aluminum core and a caustic soda solvent.

Species CCC has the special technical feature of a mild steel core and a chloridic acid solvent.

Species DDD has the special technical feature of a polymeric core and a solution liquid solvent.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALEXANDER P. TAOUSAKIS whose telephone number is (571)272-3497. The examiner can normally be reached on M-F 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bryant can be reached on (571) 272-4526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
